

Manufacture healthy electronic atomization products,
provide joyful and healthy enjoyment

贾米尔景(海南)国际贸易有限公司

Jamilion International Trading Co., Ltd. P.R.China

COMPANY PROFILE

Jamilion International Trading Co., Ltd. P.R.China is a global technology-oriented enterprise with strong competencies in technology research & development and brand operations. The company integrates the R&D, production, sales, and brand management of health-focused and fashionable consumer electronic products. Its main product line consists of premium, stylish electronic cigarette devices, promoting a new concept of healthier smoking.

With a diverse product portfolio, Jamilion International Trading Co., Ltd. remains at the cutting edge of innovation in the electronic cigarette industry. The company adheres to the business philosophy of "leading in technology, leading in quality, cost efficiency, advanced marketing networks, and strong brand influence," which continues to drive the company's rapid growth.

The company has obtained multiple certifications, including Intellectual Property Management System certification, ISO9001:2005, ISO14001:2005 Quality Management System certifications, 3C certification, CE certification, RoHS certification, and EU TPD compliance. Mission: To produce healthy electronic atomization products and deliver enjoyable, health-conscious experiences.

Vision: To become a globally recognized manufacturer of electronic cigarette products.

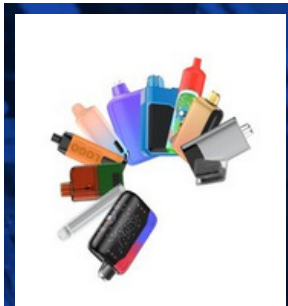

Spirit: Pragmatism, innovation, integrity, dedication, and collaboration.

Core Values: Commitment to outstanding quality, continuous product innovation, creating value for customers, and contributing positively to society.

Advantages

Professional international resources and a comprehensive development path

Comprehensive product categories

Talent team

The production capacity is being gradually put into operation

Brand supply chain

Quality control and production capacity

Temp & humidity tester

Altitude simulation chamber

Drop test

E-cigarette draw resistance testert

Battery capacity measurementt

Vibration simulation table

Here is the translation for the new product introduction process:

Concept and Design
Phase → Feasibility Study → Prototype Development → Testing and Validation → Design Optimization → Pilot Production → Production

Preparation
→ Mass Production → Launch and Promotion
→ Market Feedback and Improvement

Tobacco platform with 12 assembly lines registered, monthly production capacity exceeding 3 million units

Continuously investing new products

Production efficiency: Regular training for staff, continuous process optimization; automated assembly lines

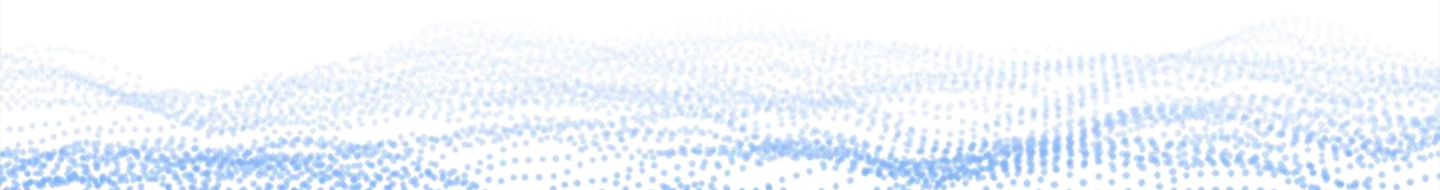

Market-oriented capacity planning

Each type of e-cigarette:

1. Direct Lung E-Cigarette: Suitable for users who seek large vapor clouds and direct inhalation into the lungs.
2. Mouth to Lung E-Cigarette: Provides a smoking experience and flavor closer to traditional cigarettes.
3. Pod System E-Cigarette: Features a convenient pod design for easy replacement and portability.
4. High Wattage E-Cigarette: Designed for high power output, catering to those who desire larger vapor clouds and enhanced flavor.
5. SHISHA Style E-Cigarette: Inspired by traditional hookah, offering a unique vaping experience.
6. Screen Display E-Cigarette: Equipped with a display screen to show parameters and operational interface for more intuitive control and feedback.
7. Refillable Pod**: Allows users to refill with e-liquid, offering flexibility in flavor and nicotine concentration.
